## # Call for workshops

TPDL traditionally hosts workshops relevant to digital libraries and adjacent research areas and provides a forum of focused, interactive and engaging discussions for groups of researchers, societies and project teams. Workshops address challenging topics from the whole digital library spectrum that require special attention and aim at presenting innovative ideas and solutions, discussing the outcomes of on-going research projects and producing interesting results, such as workshop proceedings, publications, reports and white papers.

The Organizing Committee of TPD2019 invites interested individuals, research teams, societies and project groups to submit their proposals for workshops to be organized within the framework of the conference and benefit from the presence of the larger digital library community.

## ## Proposals for workshops

Workshop proposers will be responsible for preparing a Call for Papers, structuring a Program Committee, publicizing the workshop and distributing the CfP, receiving submissions, organising a peer review and selecting the papers. The workshop papers are not included in the main track conference proceedings and the organizers are welcome to publish special issues or edited collections as most suitable for their topics.

In detail, a workshop proposal should be up to 3 p. long and include the following:

- A concise title of the workshop.
- The names and the affiliations of the organizers. The organizers should add a short biographical note with their areas of expertise and their experience in organizing workshops or related events.
- Proposed duration of the workshop (half or full day).
- An outline of the workshop's objectives and targets. The outline should also address the importance of the workshop in view of the conference and its relevance to TPD.
- The expected participants in the workshop. If the workshop has been organized before, either in the frame of TPD or any other conference, the organizers should also report the previous attendance, the outcomes, any post-workshop publication venue, etc.
- A description of the workshop's theme, its main topics and the format (the number of papers, the number of invited speakers, type of activities (e.g., short paper presentation, invited talk, demo, poster, etc.), and an approximate timeline (breaks should be synchronized with scheduled breaks if possible).
- A description of the workshop processes, such as the peer review process, a tentative list of PC members that have agreed or will be approached to serve the workshop, the timeline, advertisement, etc.

## ## Submission

Workshop proposals should be one to three pages and they can be submitted in PDF format via email at [tpdl2019@easychair.org](mailto:tpdl2019@easychair.org) by April 05, 2019.

Upon submitting the workshop proposal, the proposers commit that in case the workshop is accepted, they will physically attend and coordinate the workshop.

Notification of acceptance will be sent via email to the workshop proposers by April 15, 2019.

The selected Workshops will be organized on September 12, 2019, after the Main Track of the conference. The Organizing Committee will provide substantial support in the area of logistics management, namely registration system, catering, halls and infrastructure.

Up to two workshop chairs will be exempt from the workshop fee.

#### ## Workshop Chairs

- Milena Dobрева, UCL Qatar
- Giannis Tsakonas, University of Patras
